Who are we

The **Imperial College Bioengineering Society** is the premier student body for one of the world's leading bioengineering departments. Our mission is to act as a vital bridge between students, the department, and the commercial world. We aim to help students explore career opportunities, raise commercial interest in our members, and strengthen the community of bioengineering students and staff.

Imperial ranks

2nd

in the world
(QS Ranking 2026)

**UK's Leading
Bioengineering
Department**

975
Active Members

With a membership of 975 students, we boast a **department-wide reach**. Our members are not just passive participants; they are actively engaged in our events and initiatives. We are proud to have a **50/50 split between genders**, and represent **40+ nationalities**, with a wealth of experiences and interests in bioengineering.

Our society provides a dual talent pipeline, offering access to both a broad base of **early-career talent** and a **highly specialized group of advanced researchers**.

Undergraduate Degrees:

- MEng Biomedical Engineering
- MEng Molecular Bioengineering
- BSc Biomedical Technology Ventures

Postgraduate Taught Degrees:

- MSc Biomedical Engineering
- MSc Engineering for Biomedicine
- MSc Human and Biological Robotics

Postgraduate Research Degrees:

- MRes Bioengineering
- MRes Cancer Technology
- MRes Medical Device Design and Entrepreneurship
- MRes Neurotechnology
- PhD/MD(Res) programme

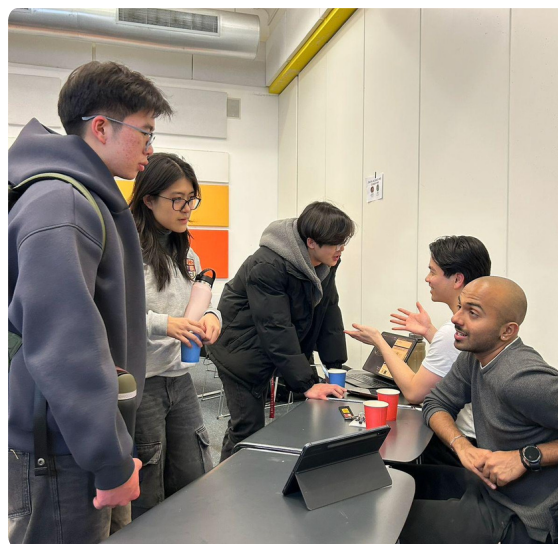

A partnership with our society is a strategic investment in direct access to the future leaders of the bioengineering industry.

Event Calendar

Autumn Term: Foundation & Networking

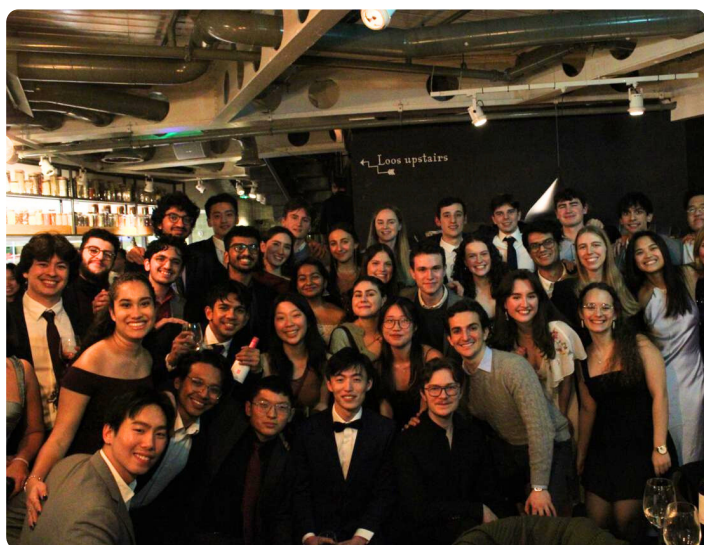

Industry Workshops/ Office Tours

We invite our partners to present about their company, share their vision, and, at times, host tours of their offices.

“Internship 101” Talk

A student-led panel providing invaluable peer-to-peer advice on securing placements and internships.

Networking Mixer

An opportunity for members to connect with industry professionals in a relaxed setting.

Social & Community Events

Including a Student-Staff Day and the annual Christmas Dinner.

Event Analytics

Each event you sponsor will take note. We provide **measurable data to demonstrate a clear return on your investment**, including detailed attendance numbers and event reviews. Additionally, we can conduct a brand reputation poll among our members before and after a partnership, providing a quantitative measure of your brand's improved standing within our community. These analytics will be provided to you in a monthly or termly update.

This list of events is still tentative and we are constantly planning and **open to organising more according to your needs and company vision**.

Event Calendar

Spring Term: Professional Development & Innovation

Annual Career's Fair

Our flagship industrial event organised by the department, bringing together students and leading companies in medical imaging, digital health, and medical devices

Termly Challenges/Hackathons

Sponsors set and judge technical challenges, providing a low-cost, high-return R&D tool and a platform for targeted talent scouting.

Summer Term: Showcase & Celebration

End-of-Year Social

A celebratory event to mark the end of the academic year and celebrate our community's achievements.

Research Showcase

An event highlighting the innovative research and projects of our members, providing a platform for sponsors to engage with future innovators.

Upcoming Big Events

We recognize that some partners may prefer to support specific initiatives rather than the society as a whole. Below are two of our flagship upcoming events where your involvement would be especially impactful.

HealthHack Hackathon

- A collaboration between the Imperial College BioMed Society, bringing together around **200 students** for a weekend of hackathons and workshops. Students will present solutions to a pressing healthcare problem, listen to industry experts, ask questions throughout the process, and network after sharing their ideas.
- Our partners will have the opportunity to **propose the healthcare-related challenge**, share insights from an industry or startup perspective, and connect directly with students throughout the weekend. They will also be able to **showcase their company**, build relationships, and **gain access to the future generation of innovators in healthcare and bioengineering**. Food and refreshments will be provided to foster a collaborative and engaging atmosphere.
- This event will take place in **late January / early February 2025**.

BioEng x Imperial Immunology x Imperial SynBio Superday

- A full-day event in collaboration with **Imperial Immunology** and **Imperial SynBio**, featuring talks, workshops, and networking sessions with leading experts from academia and industry
- Our partners will have the opportunity to **share about their company**, **connect with students directly**, and **gain access to the future generation of top Bioengineers**.
- This event will be held on a weekend day in mid-November 2024 at the Imperial College London campus.

What we offer to you

Talent & Recruitment

Sponsoring our society provides direct access to a uniquely qualified talent pipeline. Our members are trained in highly sought-after skills, and we offer innovative solutions to streamline your recruitment process.

Curated CV Book

We offer a carefully curated CV booklet of our members, categorized by specialized fields such as machine learning, neuroscience, and computational biology, allowing you to efficiently target the exact talent you need.

Targeted Engagement

Co-hosting a workshop or setting a hackathon challenge allows you to directly assess students' problem-solving skills on real-world problems and identify top performers.

Product Familiarisation

Workshops focusing on your core product to familiarize a new generation of engineers with your cutting-edge technology, creating future brand advocates and users.

Brand visibility & Market Presence

We offer a continuous and high-impact platform for your brand to gain visibility among a highly influential demographic.

Broad Reach

With a membership of nearly 1,000 students, your brand will have maximum impact within this targeted community.

Digital & Physical Presence

Your logo will be featured on our website, social media, and physical event marketing materials, ensuring continuous exposure throughout the year.

Beyond recruitment, our society serves as a channel for innovation. Engage with our members to pilot new concepts, test software, and gain valuable insights from the next generation of engineers.

Innovation Pipeline

Our termly challenges and workshops allow you to leverage student creativity to solve real-world problems.

Strategic Alignment

Partner with a community that is already well-versed in working at the intersection of academia and industry, building a foundation for future collaborations.
